DETAILED ACTION

Specification

1. The disclosure is objected to because of the following informalities:

In line 10 on page 13, "294" should be - -394- -.

Appropriate correction is required.

Claim Objections

2. Claims 6-15 are objected to because of the following informalities:

(1) In claim 6, lines 8 and 9, insert - -phase- - before "signal", respectively;

(2) In claim 3, line 2, insert - -phase- - before "signal"; and

(3) In claim 12, line 12, insert - -phase- - before each of "signal".

Appropriate correction is required.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1-21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

Art Unit: 2634

The specification does not describe a constant current circuit in response to a logical combination of the first clock phase signal and the second clock phase signal as recited in claim 1 and a current steering circuit as recited in claims 6, 12 and 16. There is also no corresponding drawing for the embodiment as recited in claims.

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the first phase detector circuit" in lines 9-10. There is insufficient antecedent basis for this limitation in the claim.
